WORKSHOPS

01

REGISTER FOR
ATE 

Accessible Teaching Essentials

Accessible Teaching Essentials (ATE) is a three-week, online workshop for faculty who are new to the topic of accessibility. We focus on introducing the issues at stake, providing an approachable structure for making course content accessible, how to check course content for accessibility, and providing training and resources for creating accessible course content.

Participants who complete the ATE workshop will earn the Accessible Teaching Essentials badge, a digital credential which they can share on social media sites such as LinkedIn.

Accessible Teaching Essentials is being offered three times in 2023 starting on the following dates:

1. January 23
2. May 22
3. September 11

REGISTER FOR
UDLEX 

The UDL Experience

The UDL Experience (UDLEX) is a three-week workshop designed to give Kennesaw State faculty an opportunity to collaborate on applying Universal Design for Learning principles to course lessons, content, activities, and assessments. This workshop assumes that faculty who attend already have a basic working knowledge of Universal Design for Learning and want to learn more about how to use it in their own course.

The UDL Experience is being offered once in 2023, starting **October 16**

WEBINARS

Webinars 

Equidox PDF Accessibility Remediation Webinar

If you have taken one of our previous PDF remediation webinars, you may have felt more informed but also a little overwhelmed! Working with Adobe Acrobat Pro can be very difficult and time-consuming. The good news is that KSU has just acquired a new PDF remediation software that makes PDF remediation quicker and much easier! This webinar will give you a brief introduction to help you get started.

Understanding Accessibility Webinars

The "Understanding Accessibility" webinars are intended to move beyond thinking about accessibility in terms of simple rules and try to develop an understanding of how accessibility works.

Understanding Accessibility: Tables

In this webinar, we'll experience how a table is read by a screen reader, focus on what makes a table accessible, and learn the different kinds of headings you can have in a table based on the type of data in the table. We'll also work with different types of tables in two different formats: Microsoft Word and PDF (using Equidox).

In this webinar, we'll experience how a list style is read by a screen reader, focus on making them accessible, and learn the ways that a list may look accessible to a checker but may not actually be accessible. We'll explore when and why a list should probably not be used and work with lists in two different formats: Microsoft Word and PDF (using Equidox).

Understanding Accessibility: List Styles
